Solution Portfolio

**Design Security**

- **Strategic Security Consulting**
  - Strategic security development, security vision and roadmap
  - Security standardization, lobbying, and strategic cooperation

- **Security Trainings**
  - Security Basics
  - Security Risk Analysis
  - Secure Product Design
  - Secure Connected Products
  - Automotive Security

- **Product Security Consulting**
  - Security Risk & Threat Analyses, Protection Requirements
  - Security Concepts & Design
  - Security Roles & Processes
  - Custom Consulting

- **Product Security Engineering**
  - Security Specifications
  - Security Implementations
  - Security Integration
  - Security Production
  - Security Management

- **Security Testing**
  - Functional Security Testing
  - Vulnerability Scans & Fuzzing
  - Penetration Testing
  - Code Security Audits
  - Security Certifications
  - Security Test Management

**Enable Security**

- **Managed PKI Service**
  - Allows OEMs to maintain internal control over vital aspects of security such as certificate issuance, suspension, and revocation.

- **Security Operations Center (SOC)**
  - Acts as mission control, tracking anomalies and events in any aspect of a vehicle's operation.

- **Threat Intelligence and Forensics**
  - Delivers evidence-based knowledge about existing or emerging menaces to induce informed decisions and responses.

- **Vulnerability Management**
  - Helps uncover flaws and enables OEMs to implement a proactive threat prevention strategy.

**Manage Security**

- **Managing PKI Service**
  - Allows OEMs to maintain internal control over vital aspects of security such as certificate issuance, suspension, and revocation.

- **Security Operations Center (SOC)**
  - Acts as mission control, tracking anomalies and events in any aspect of a vehicle's operation.
